

AUSTRALIAN TAX OFFICE ADELAIDE FITOUT

The new 32,000sqm \$45m Australian Tax Office fitout in Adelaide brings together several ATO sites arranged over 14 floors and is the largest fitout undertaken in Adelaide. The building core on each floor references the shopfronts and streetscape of Adelaide, while the natural-inspired palette of autumnal and coastal colours alludes to the varied, natural landscape unique to South Australia.

Hardy Milazzo worked closely to integrate the fitout with the base building envelope to ensure it achieves a 5 Star Green Star rating. The new office accommodation facilitates the use of the latest information technology and meets the ATO standards in ergonomic design, security and safety.

The fitout incorporates best workplace principles providing open plan workspaces to facilitate interaction and team cohesion, varied work points to cater for a diverse range of tasks, collaborative zones, clearly defined breakout spaces and a mix of informal and formal meeting areas. The design seeks to create a strong connection and sense of ownership between the fit out, the site location and the local community. Winner at the MBA Awards 2013 - Excellence in Commercial Fitout
